Annotation: This article provides information on educational decisions, continuing education, and the work being done to develop the education system.

Keywords: Education, continuing education, decision on education, preschool education.

On the basis of the Decision of the President of the Republic of Uzbekistan No. PQ-3304 dated September 30, 2017; the activity of the Ministry of Public Education of the Republic of Uzbekistan was improved. In accordance with this decision, the following should be defined as the main tasks and activities of the Ministry of Public Education of the Republic of Uzbekistan; firstly, implementation of a unified state policy aimed at developing the public education system, comprehensive development of general secondary education and out-of-school education, further raising the knowledge and moral level of students; secondly, organizational-methodical measures for the introduction of 11-year secondary education by ensuring mutual integration between secondary schools and secondary special, vocational educational institutions Measures were taken to implement the system. There are several concepts that are related to a person's acquisition of life experiences in the form of knowledge, skills and abilities. This is educational activity, education, study and learning. Let's move on to education. Education consists of the joint educational activity of the teacher and the student, it is the process of transferring knowledge, skills and abilities, the educational process is a separately organized and controlled activity, it is the educational process of the students. Organizes activities and manages them. The educational process consists of five elements:

1. The purpose of education - why is it necessary to teach?
2. The content of education - what should be taught?
3. Methods of education, methods and ways of pedagogical communication.
4. Educator.
5. Student.

It is the transfer of life experience from the teacher to the student. The educational process first of all requires the development of students' attention. The use of visual aids and information technology tools in lessons is one of the factors that develop the attention of the learner. Continuing education in the Republic of Uzbekistan is organized in accordance with the requirements of state education standards and educational programs. Organization of continuing education is based on certain principles. Including:

- ✓ the priority of education;
- ✓ democratization of education;
- ✓ humanization of education;

- ✓ socialization of education;
- ✓ national orientation of education;
- the integral connection of education and upbringing, the orientation of this process to the formation of a person who has matured in all respects; — identifying talented young people, creating conditions for them to consistently receive fundamental and special education at the highest level of education. Continuing education includes the following types of education:
 - ✓ preschool education;
 - ✓ general secondary education;
 - ✓ secondary special, vocational education;
 - ✓ higher education;
 - ✓ post-secondary education;
 - ✓ improvement of staff qualifications and their retraining;
 - ✓ extracurricular education

In order to ensure the implementation of the Decree No. PF-4958 dated February 16, 2017 of the President of the Republic of Uzbekistan "On the further improvement of the system of post-secondary education" of the Cabinet of Ministers on May 22, 2017 "On measures to further improve the post-graduate education system" The decision was adopted. In accordance with this decision, education at the institution of post-secondary education is organized in the following forms: basic doctoral studies; doctoral studies; independent research. Such changes led to further development of the education system. The objective needs of society's development are based on education itself. Education ensures that a person enters the world of work more effectively and joins the life of society. Education is a process; it is a result and a system. Education as a process is the organization of special work aimed at mastering a certain set of knowledge, skills and abilities, relevant experience of activities and relationships. Education is the level achieved in the assimilation of knowledge, activity and relational experience as a result. Education as a system is a complex of state institutions management bodies, within which the process of educating a person is carried out.

In conclusion, it should be said that after we gained independence, a lot of attention was paid to the field of education. Decisions about food are a clear example of this. Currently, schools are 11 years old and conditions are being created for students to be more engaged in the field they are interested in. Especially nowadays, attention is increasingly being paid to the field of preschool education. In Article 8 of the Law on Education of Uzbekistan, pre-school education and upbringing is aimed at educating and raising children, developing them intellectually, spiritually, morally, ethically, aesthetically and physically, as well as preparing children for general secondary education. focusing on training for education. So the current conditions are an opportunity given to us young people.
